MODULES

ACCOUNTS
Our account module provides maximum speed and accuracy in operation. It helps to record and updates the sales and purchases timely and to maintain the transactions like cash, bank and journals. It generates all printable form of cash book, day book trial balance, depreciation P&L & BS

SALES
This module deals with all sales point activities like collecting the sale orders, preparation of sales bills and delivery challan. Sales modules supports CFT, TON and M3 measurement standards. Sales can be integrated with Weigh Bridge. Various sales analytic reports will provide us fair idea about sales activities.

INVENTORY
Inventory handles consumables store management (centralized and local). Covers activities like preparations of purchase order, purchases, purchase return, issue and issue returns. It has separate stock management for tyres and consumables. The advanced reorder level indicator will help the user to initiate purchase timely.

QUARRY
Quarry module covers all quarrying activities like drilling, blasting and raw material transportations. It has provisions for raw material purchases, raw material stock reports will help to find out the exact raw material stock and have reports like drill bit usage report, performance analysis of compressors, drilling blasting ratio analysis, raw material production report.

PLANT
Plant module covers with all production activities, Plant maintenances and preventive maintenances. This module will help the user to trace out the exact production details. The Breakdown log and maintenance log in the application will ensure the proper utilization of machineries.

PROFIT CENTRE
Profit centre module is the main highlight of our application. It will keep track the utilization of Vehicles, Equipments, and Compressors. The integrated Trip sheet monitoring system will help to find out the Mileage. Actual expenditure and Diesel consumption.

PAYROLL
It consists of calculation of salaries an tax deductions of employees; it also can be called as an accounts activity which undertakes the salary administration of employees in the organization. Our Payroll module support manual attendance and electronic attendance like punch cards, bio metric devices IR devices etc.
